sarun saengsomboon

Bangkok, Bangkok City, Thailand

Summary

Experienced technology professional with 20 years in information technology:

- 2017-Present: Team Management & UX/UI (7+ years)
- 2013-2017: UX/UI Design (4 years)
- 2012-2013: System Analysis (1 year)
- 2005-2012: Software Development (7 years)

I help teams create user-friendly software and manage projects from planning to launch, combining technical skills with leadership experience. Since 2023, I've integrated AI tools into my workflow, using ChatGPT and Claude for rapid prototyping and Claude Code for developing production-ready applications including mobile apps, web platforms, and LINE OA integrations.

Experience

devio co., ltd
Co-Founder & UX / UI Lead
April 2017 - Present (8 years 6 months)
Bangkok Metropolitan Area, Thailand

- Leveraged AI tools (ChatGPT, Claude) since 2023 for design ideation and user research analysis.
- Built production applications using Claude Code (2025) including mobile/web apps, LINE OA chatbots, and automated trading POCs with N8N.
- Track the project's scope from proposal to technical workup to product delivery.
- Participate in the early stages of conception with a client and relay their expectations to the team.
- Defines product vision clear goal and direction of each sprint to all team.

- Created wireframes and prototypes used design tools (Figma, Sketch, Adobe XD).

- Worked with designers and developers in the team.

- Worked with developers to ensure that design decisions are feasible.

- Worked with designers, developers, Project Manager, and Client used Collaboration Tools (Jira, Trello, Figjam, Invision , Marvel , Overflow, Github, Notion, Coda, Zeplin, Google Docs).
